OUR STORY

Neurotic Mirage is a 3-piece band hailing from San Diego, CA. Formed in 2015, the band recorded a four-song demo at Earth-Verb Studios in Cardiff, CA. Shortly thereafter, the band released their first EP in March of 2016 dubbed "Haywire Culture". The album includes 9 tracks and was recorded with the legendary Jeff Forrest at Double-time Studios in Santee, CA. The band mixes a Southern California punk sound with metal guitar riffing, a heavy bass line, clean vocal melodies, and insane metal drums.

"Psycho Carnival" is the bands newest album to be released May 5, 2019. The band has played numerous shows, been featured on radio stations and podcasts, and have opened for national touring acts such as Powerman 5000. The band is currently looking to expand their horizons across the U.S. and even across the globe by opening for national acts, playing large festivals, and touring.
